DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

After further review of applicant's remarks filed June 4, 2004 examiner agrees with applicants argument that the prior art fails to disclose an oil fluorescence quenching marker, wherein the specification defines this quenching marker as a marker that decreases the amount of fluorescence. Upon, further searching the examiner failed to discover any new prior art disclosing applicant's limitations.

Regarding claim 1, the prior art fails to disclose or make obvious an apparatus for investigating a fluid stream containing oil having an injector which injects an **oil fluorescence quenching marker** into the oil of the fluid stream at a first location, and in combination with the other recited limitations of claim 1. Claims 2-15 are allowed by the virtue of dependency on the allowed claim 1.

Regarding claim 16, the prior art fails to disclose or make obvious a method for investigating a fluid stream containing oil having the step of injecting at a first time an oil fluorescence quenching marker into the oil of the fluid stream at a first location, and in combination with the other recited limitations of claim 16. Claims 17-21 are allowed by the virtue of dependency on the allowed claim 16.
